DANUBE TURBINE

4000 x 2300 x 1500 mm

one-person swimming pool

Danube Turbine has a counter-current W-Power turbine, that capable of moving 150-160 cubic meters of water per hour (4 adjustable positions), with 75% lower power consumption (7 Amperes only), and twice the water yield in comparison with swim spa engines. Incredible performance is combined with energy efficiency - it can even be operated on single-phase electric power.

optional

sound system

towel holder

easy cover lifter

spa umbrella

Wellstep

automatic filter cleaner

wooden spa step

scandinavian insulation
